TEAMUP FOR CHILDREN

CARE

Universal preventive

touch introduces the

integrated team and

parenting support

<u>Transformation Model Explained:</u> **CHW Version**

STRENGT

· Augment support during the prenatal-postpartum transition Promote strength-based parenting and access to early

FOUNDATIONS

childhood education

ENHANCE SCREENING

 Screen for social, developmental. and behavioral issues Screen for parental concerns and social determinants of health

Material needs and screeners can be

completed by CHWs

CHWs work alongside and on behalf of families to navigate community

- · Address material needs and identify emerging behavioral issues
- Engage families in comprehensive, integrated care
- Build population health strategic and refine clinical workflows

Families initiate care with the integrated team, often on the same day as their

BRIDGE CONNECTIONS

- · Navigate families to Early Intervention and community-based services
- · Provide innovative pathways

to specialists

CHWs create closed loop referrals with Early Intervention and resources

- Fully commit to transformation Engage leaders and empower
- Involve families and the community

READY THE ENVIRONMENT

- Optimize revenue and prepare for sustainability
- Fortify EMR and reporting systems Prepare the physical space
- Foster a trauma-forward, culturally-responsive environment

- · Augment staffing and establish new roles on the care team
- · Grow evidence-based knowledge and clinical skills

Evidence-informed

a team-based approach to BH care

· Collaborate in a team-based approach to care

Investments in infrastructure – EMR, revenue cycle, space – provide a strong foundation
